

MERT KAMBEROV

DATA ENGINEER

mert.m.kamberov@gmail.com | +359897790215 | Sofia | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Engineer with strong foundation in mathematics, analytical thinking and problem solving who is experienced in building scalable ETL pipelines, and delivering production ready data. Strong background in Python, SQL, Databricks, APIs, PySpark, Pandas and data processing. Proven ability to collaborate with data scientists and business teams to deliver reliable data infrastructure and analytics-ready data.

KEY COMPETENCIES

- Python
 - Relational Databases
 - ETL/ELT Pipelines
 - DevOps
 - Data Transformation and Validation
 - Cloud computing
-

PROFESSIONAL EXPERIENCE

Data Engineer

February 2025 – Present

@ Indeavr

- Maintained Azure Data Factory based data ingestion pipelines, that ingested data from PowerBI REST API, MS SQL Serve, Azure Log Analytics workspace
- Developed Python based automations assisting PowerBI tenant management
- RnD on containerisation use cases in data engineering. Developed a containerised REST API data ingestion(Python) and transformation(Spark) solution orchestrated with Kubernetes
- Migrated legacy Azure Data Factory based data ingestion pipelines into Databricks
- Mentored new colleagues

Intern Data Engineer

June 2024 – September 2024

@ PROS

- Built a data pipeline for a big airline company flights data
 - Monitor the integrity and quality of the incoming and outgoing data
 - Loading the processed data onto the internal PROS platform and running a price and demand prediction model
-

EDUCATION

Information Technology @ Natural Sciences and Mathematics High School (2017-2021)

Smart Systems and Artificial Intelligence @ Technical University of Sofia (2022-still)

Various courses with certifications to them
